Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 15-20 drawn to a customer operated ticket dispenser, classified in class 705, subclass 15.
- II. Claims 21-23, drawn to an automated dispenser, classified in class 700, subclass 231.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility such as air line reservation system having a meal option. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (703) 305-0731.
